🧠 SKILLS

HTML5 | CSS3 | JavaScript | React JS | React Redux | Tailwind | GitHub | JAVA | UNIX | Oracle | NodeJS

💼 PROFESSIONAL EXPERIENCE

January 2021- Present	**Accenture Solutions Private Limited**

EmBARC, *Frontend Developer*

06/2023 – 12/2023

- Led enhancements on the EMBARC APP for Bristol Myers Squibb pharmaceutical company, focusing on user experience and functionality.
- Coordinated a new release, managing change requests in ServiceNow and documenting changes in Docit.
- Conducted rigorous testing using ALM to ensure application reliability and robust performance.
- Utilized Oracle as the backend database, proficiently managing it with DBeaver.
- Implemented new screens and enhanced filtering options for an improved user interface.
- Integrated multiple download options for files, enhancing user accessibility and data viewing.
- Tech stack - Java, HTML, CSS, and JavaScript

Spotfire

01/2023 – 04/2023

- Developed custom Spotfire dashboards to visualize and analyze real-time data from the MAE portal.
- Collaborated with cross-functional teams to elicit and gather client requirements, facilitating the creation of tailored dashboards to meet their specific data analysis needs.
- Managed JIRA stories to oversee and track the development of Spotfire dashboards, ensuring their timely delivery and client satisfaction.
- Designed and implemented interactive visualizations to illuminate insights and empower data-driven decision-making for clients.
- Tech stack - Spotfire

Service Now

- Effectively resolved over 1200+ ServiceNow RITMs and Incidents within a year as part of the support activities for applications under the GBDS team.
- Demonstrated 100% adherence to SLAs while also contributing to member firm onboarding activities.

Achievements - *Beacon Award 2023*

📁 PROJECTS

DrakenDeliver - React Food Delivery App ⬈

*Built a sample food ordering app inspired by Swiggy. (**GitHub:** - https://github.com/akku213/DrakenDeliver/ ⬈)*

- Implemented Swiggy APIs for real-time restaurant data and menu retrieval.
- Utilized Redux Toolkit for cart and state management, simplifying item additions/removals.
- Implemented smooth routing and navigation with React Router DOM.
- Optimized application performance through bundling, fast refresh, JSX support and code splitting using Parcel.
- Optimized code splitting and chunking with Lazy Loading and Custom Hooks.
- Tech stack - Parcel.js, React.js and Swiggy Public APIs for fetching real-time restaurant lists and menus.

COURSES

04/01/2024 –
10/02/2024

Namaste React, *Akshay Saini*
Certificate ⊿

EDUCATION

August 2016 –
October 2020

B. Tech in Computer Science and Technology
Usha Mittal Institute of Technology, Santacruz, Maharashtra
CGPA: 8.71
- *Object-Oriented Programming*
- *Software Engineering*
- *Operating System*
- *Database Management System*
- *Data Structures and Algorithms*
