EXPERIENCE

Accenture Solutions Private Limited
Data Eng, Mgmt & Governance Analyst   *Jan 2021 – Present*

1. **EmBARC**, *Frontend Developer*

   - Led enhancements on the EMBARC Application for **Bristol Myers Squibb pharmaceutical company**, focusing on user experience and functionality.
   - Introduced an Access Type field for **user-defined access restrictions**.
   - Developed a **multi-file download feature**, allowing users to download files as a zip in different formats.
   - Introduced a **new screen** for Global Administrators to update project descriptions and study names
   • **Tech stack** - Java, HTML5, CSS3, and JavaScript

2. **SFTP MoveIT Integration**, *Shell Scripting Developer*

   - Translated complex business requirements into actionable digital solutions, fostering collaboration and achieving project goals.
   - Modified existing **shell scripts** to align with business requirements, facilitating the **transfer** of uploaded files from inbound and outbound study locations to designated target locations.
   - Implemented **cron scheduling** for automated execution and configured **email** notifications to **alert** preconfigured recipients about the success or failure of file movement operations.
   • **Tech stack** – Unix (Shell Scripting)

PERSONAL PROJECTS

WARDROBEZZ | [GitHub](#) | [Live](#)

Description:

1. Developed a **MERN** stack **ecommerce** platform that provides users with a smooth shopping journey.
2. Implemented **admin** access featuring a comprehensive **dashboard** for analyzing sales, user activity, inventory, and other pertinent data.
3. Integrated **stripe payment gateway** to ensure secure and seamless transactions for enhanced user experience.

EDUCATION

Usha Mittal Institute of Technology
Santacruz   **CGPA - 8.71**

- Object-Oriented Programming
- Software Engineering
- Operating System
- Database Management System
- Data Structures and Algorithms

MY WORK

- [GITHUB](#)
- [LINKEDIN](#)
- [PORTFOLIO](#)

TECHNICAL SKILLS

- **Languages:** Oracle, Java, HTML5, CSS3, JavaScript, NoSQL

- **Developer Tools:** VS Code, Eclipse, Redux Dev Tools, DBeaver, Spotfire, Power BI, Linux

- **Technologies/Frameworks:** REST API, MongoDB, Tailwind CSS, React, Node.js, Git/GitHub, JSON, Axios, Redux Toolkit, Google Analytics, DevOps principles

Learnings:

- Incorporated **CORS** (cross-origin resource sharing) to enable cross-origin access and **JWT** for password encryption and authentication.
- Leveraged react **Redux-Thunk**, React Routers, react hooks, **Axios**, and local storage.
- Ensured continuous login session maintenance and implemented node mailer for **password reset functionality.**

DRAKENDELIVER | GitHub | Live

Description:

1. Integrated **Swiggy APIs** for real-time restaurant data and menu retrieval.
2. Utilized **Redux Toolkit** for seamless cart and state management.
3. Implemented smooth routing and navigation with **React Router DOM**.
4. Optimized application performance through bundling, fast refresh, and **JSX** support.
5. Enhanced efficiency with code splitting, **Lazy Loading**, and **Custom Hooks** for a user-friendly experience.

Learnings:

- Integration of third-party APIs for **real-time data retrieval**
- State management with Redux Toolkit, improving application **scalability** and **maintainability.**
